

Hardware included

Tools included

Removal tool

Tools needed

Phillips-head screwdriver

Drill with a 1/4 in (6 mm) masonry bit (optional)

1.

Download the Ring app.

2.

Scan the QR code.

3.

Remove the protective wrap.

4.

Choose a location for your doorbell.

Doorbell installation

1.

Without plugging in the power adapter, run the power cable from the outlet to where you're installing your doorbell.

2.

Secure the power cable with the included cable clips.

NOTE: If running the cable through a wall, door, or window, exercise caution for electrical wiring and pipes when drilling.

3.

(Optional) If using a corner mount, install the mount over your doorbell wires using the bottom holes in the top and bottom sections, ensuring it is facing in your desired viewing direction.

NOTE: Multiple corner mounts can be stacked together. We do not recommend more than two.

On stucco, brick, or concrete, use a 6 mm (1/4 in) masonry bit to drill holes for the included wall anchors.

(Optional) If using a wedge mount, install the mount over your doorbell wires using the screws included with your wedge kit, ensuring it is facing down.

NOTE: Multiple wedge mounts can be stacked together. We do not recommend more than two.

On stucco, brick, or concrete, use a 6 mm (1/4 in) masonry bit to drill holes for the included wall anchors.

4.

(Optional) If installing multiple wedge or corner mounts, insert screws through both mounts to hold them together.

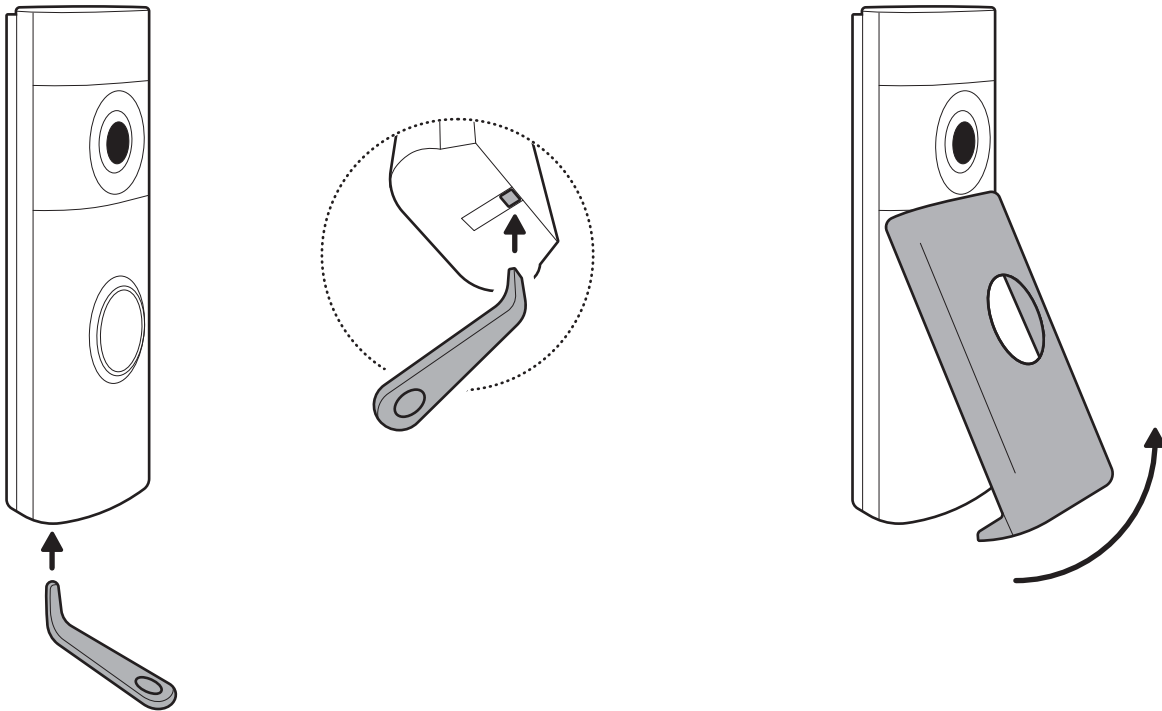

5.

Install the mounting bracket on your mount or directly over the doorbell wiring with the included screws.

6.

Remove your doorbell's faceplate by inserting the removal tool into the slot at the bottom of your doorbell.

7.

Connect the power cable to your doorbell's wire terminals.

NOTE: You can attach any wire to any terminal.

8.

Mount your doorbell by hooking it over the bracket and pushing down.

9.

Tighten the security screw.

10.

Plug in the power adapter.

11.

Ring your doorbell to ensure everything is properly connected.

12.

Reattach the faceplate.

Matériel inclus

Outils inclus

Outil de retrait

Outils nécessaires

Tournevis cruciforme

Perceuse avec mèche de 6 mm (facultatif)

1.

Téléchargez l'application Ring.

2.

Scannez le code QR.

3.

Retirez l'enveloppe de protection.

4.

Choisissez un emplacement pour votre sonnette.

Installation de la sonnette

1.

Faites passer le câble d'alimentation de la prise à l'endroit où vous installez votre sonnette, sans brancher l'adaptateur secteur.

2.

Fixez le câble d'alimentation à l'aide des clips serre-câble inclus.

REMARQUE : si vous faites passer le câble à travers un mur, le cadre d'une porte ou d'une fenêtre, faites attention aux fils électriques et aux tuyaux lors du perçage.

3.

(Facultatif) Si vous utilisez un support d'angle, installez-le sur les fils de votre sonnette à l'aide des trous inférieurs situés dans les parties supérieure et inférieure, en veillant à ce qu'il soit orienté vers la direction de vision souhaitée.

REMARQUE : plusieurs supports d'angle peuvent être empilés. Nous vous recommandons de ne pas en utiliser plus de deux.

Utilisez le foret de maçonnerie de 6 mm pour percer des trous dans votre mur en stuc, en brique ou en béton, puis insérez les ancrages.

(Facultatif) si vous utilisez un support d'orientation, installez-le sur les fils de votre sonnette à l'aide des vis incluses dans votre kit de cales, en veillant à ce qu'il soit orienté vers le bas.

REMARQUE : plusieurs supports d'orientation peuvent être empilés. Nous vous recommandons de ne pas en utiliser plus de deux.

Utilisez le foret de maçonnerie de 6 mm pour percer des trous dans votre mur en stuc, en brique ou en béton, puis insérez les ancrages.

4.

(Facultatif) Si vous installez plusieurs supports d'angle ou d'orientation, insérez des vis dans les deux supports pour les assembler.

5.

Installez le support de fixation sur votre support ou directement sur le câblage de la sonnette à l'aide des vis incluses.

6.

Retirez la façade en insérant l'outil de retrait dans la fente située sous votre sonnette.

7.

Connectez le câble d'alimentation aux bornes de la sonnette.

REMARQUE : vous pouvez brancher n'importe quel fil à n'importe quelle borne.

8.

Fixez votre sonnette en l'accrochant au support et en appuyant vers le bas.

9.

Serrez la vis de sécurité.

10.

Branchez l'adaptateur secteur.

11.

Faites sonner votre sonnette pour vérifier que tout fonctionne correctement.

12.

Remettez la façade en place.

Im Lieferumfang enthaltenes Montagematerial

Enthaltene Werkzeuge

Ablösewerkzeug

Benötigte Werkzeuge

Kreuzschlitzschraubendreher

Bohrmaschine mit 6-mm-Steinbohrer (optional)

1.

Laden Sie die Ring-App herunter.

2.

Scannen Sie den QR-Code.

3.

Entfernen Sie die Schutzfolie.

4.

Wählen Sie einen geeigneten Installationsort für die Türklingel.

Montage der Türklingel

1.

Ohne das Netzteil anzuschließen, führen Sie das Netzkabel von der Steckdose bis zu dem Ort, an dem Sie die Türklingel installieren.

2.

Befestigen Sie das Netzkabel mit den mitgelieferten Kabelschellen.

HINWEIS: Wenn Sie das Kabel durch eine Wand, Tür oder ein Fenster führen, achten Sie beim Bohren auf elektrische Leitungen und Rohre.

3.

(Optional) Wenn Sie eine Eckhalterung verwenden, montieren Sie die Halterung über Ihren Türklingeldrähten. Verwenden Sie dazu die unteren Löcher im oberen und unteren Bereich, und achten Sie darauf, dass sie in die gewünschte Blickrichtung zeigt.

HINWEIS: Es können mehrere Eckhalterungen übereinander montiert werden. Wir empfehlen nicht mehr als zwei.

Bohren Sie bei der Montage auf Putz, Ziegelstein oder Beton mit einem 6 mm dicken Steinbohrer Löcher für die enthaltenen Wanddübel.

(Optional) Wenn Sie eine Keilhalterung verwenden, montieren Sie die Halterung über Ihren Türklingeldrähten. Verwenden Sie dazu die Schrauben, die im Lieferumfang des Keilsatzes enthalten sind. Achten Sie darauf, dass sie nach unten zeigt.

HINWEIS: Es können mehrere Keilhalterungen übereinander montiert werden. Wir empfehlen nicht mehr als zwei.

Bohren Sie bei der Montage auf Putz, Ziegelstein oder Beton mit einem 6 mm dicken Steinbohrer Löcher für die enthaltenen Wanddübel.

4.

(Optional) Wenn Sie mehrere Keil- oder Eckhalterungen montieren, führen Sie die Schrauben durch beide Halterungen, um sie zusammenzuhalten.

5.

Montieren Sie die Montagehalterung mit den mitgelieferten Schrauben an der Halterung oder direkt über der Türklingelverdrahtung.

6.

Nehmen Sie die Blende der Türklingel ab, indem Sie das Ablösewerkzeug in den Schlitz unten an der Türklingel einführen.

7.

Verbinden Sie das Netzkabel mit den Kabelklemmen der Türklingel.

HINWEIS: Es ist egal, welchen Draht Sie an welche Klemme anschließen.

8.

Montieren Sie die Türklingel, indem Sie sie an der Halterung einhaken und nach unten drücken.

9.

Ziehen Sie die Sicherheitsschraube fest.

10.

Stecken Sie das Netzteil ein.

11.

Betätigen Sie die Türklingel, um sicherzustellen, dass alles richtig angeschlossen ist.

12.

Bringen Sie die Blende wieder an.

Materiale per l'installazione incluso

Strumento incluso

Strumento di rimozione

Strumenti richiesti

Cacciavite con punta a croce

Trapano con punta per muratura da 6 mm (facoltativo)

1.

Scaricare l'app Ring.

2.

Scansionare il codice QR.

3.

Rimuovere l'involucro protettivo.

4.

Scegliere una posizione per il videocitofono.

Installazione del videocitofono

1.

Senza collegare l'alimentatore, far passare il cavo di alimentazione dalla presa al punto in cui si vuole installare il videocitofono.

2.

Fissare il cavo di alimentazione con i serracavi inclusi.

NOTA: se si fa passare il cavo attraverso una parete, una porta o una finestra, prestare attenzione a fili elettrici e tubi durante la perforazione.

3.

(Facoltativo) In caso di installazione ad angolo, installare il supporto angolare sui fili del videocitofono utilizzando i fori inferiori delle sezioni superiore e inferiore, assicurandosi che sia rivolto nella direzione desiderata.

NOTA: è possibile impilare più supporti angolari. Si consiglia di non utilizzarne più di due.

Per superfici in stucco, mattoni o cemento, utilizzare una punta da trapano per muratura da 6 mm per praticare i fori per i tasselli inclusi.

(Facoltativo) In caso di installazione con supporto a cuneo, installare il supporto sui fili del videocitofono utilizzando le viti incluse con il kit con cunei, assicurandosi che sia rivolto verso il basso.

NOTA: è possibile impilare più supporti a cuneo. Si consiglia di non utilizzarne più di due.

Per superfici in stucco, mattoni o cemento, utilizzare una punta da trapano per muratura da 6 mm per praticare i fori per i tasselli inclusi.

4.

(Facoltativo) Se si installano più supporti a cuneo o ad angolo, inserire le viti attraverso entrambi i supporti per tenerli uniti.

5.

Installare la staffa per il montaggio sul supporto o direttamente sopra il cablaggio del videocitofono con le viti incluse.

6.

Rimuovere la mascherina del videocitofono inserendo lo strumento di rimozione nella fessura sul fondo del videocitofono.

7.

Collegare il cavo di alimentazione ai terminali dei fili del videocitofono.

NOTA: è possibile collegare qualsiasi filo a qualsiasi terminale.

8.

Montare il videocitofono agganciandolo alla staffa e spingendolo verso il basso.

9.

Serrare la vite di sicurezza.

10.

Collegare l'alimentatore alla presa.

11.

Suonare il campanello per verificare che tutti gli elementi siano collegati in modo corretto.

12.

Ricollocare la mascherina.

Herramienta de extracción

Herramientas necesarias

Destornillador de estrella

Taladro con broca de albañilería de 6 mm (opcional)

1.

Descarga la app de Ring.

2.

Escanea el código QR.

3.

Retira el envoltorio protector.

4.

Elige una ubicación para tu videotimbre.

1,20 m (4 ft)

Instalación del videotimbre

1.

Sin enchufar el adaptador de corriente, extiende el cable de alimentación desde la toma de corriente hasta el lugar en el que vayas a instalar el timbre.

2.

Fija el cable de alimentación con las abrazaderas de cable suministradas.

NOTA: si pasas el cable a través de una pared, puerta o ventana, ten cuidado con el cableado eléctrico y las tuberías al taladrar.

3.

(Opcional) Si utilizas un soporte en esquina, instálalo sobre los cables del timbre utilizando los orificios inferiores de las secciones superior e inferior, asegurándote de que quede orientado en la dirección que deseas capturar.

NOTA: se pueden apilar varios soportes en esquina. Sin embargo, no recomendamos más de dos.

En estuco, ladrillo u hormigón, utiliza una broca de albañilería de 6 mm para perforar los orificios en los que irán introducidos los tacos de pared incluidos.

(Opcional) Si utilizas el soportes de ajuste, instálalo sobre los cables del timbre con los tornillos incluidos en el kit de ajuste, asegurándote de que quede orientado hacia abajo.

NOTA: se pueden apilar varios soportes de ajuste. Sin embargo, no recomendamos más de dos.

En estuco, ladrillo u hormigón, utiliza una broca de albañilería de 6 mm para perforar los orificios en los que irán introducidos los tacos de pared incluidos.

4.

(Opcional) Si instalas varios soporte de ajuste o en esquina, debes introducir los tornillos en todos ellos para que no se separen.

5.

Instala el soporte de montaje sobre el soporte de ajuste o en esquina, o directamente sobre el cableado del timbre con los tornillos suministrados.

6.

Retira el panel frontal del timbre insertando la herramienta de extracción en la ranura de la parte inferior.

7.

Conecta el cable de alimentación a los terminales del cableado del timbre.

NOTA: puedes conectar cualquier cable a cualquier terminal.

8.

Monta el timbre enganchándolo encima del soporte y empujando hacia abajo.

9.

Aprieta el tornillo de seguridad.

10.

Enchufa el adaptador de corriente.

11.

Llama al timbre para asegurarte de que todo está correctamente conectado.

12.

Vuelve a colocar el panel frontal.

Inbegrepen hardware

Inbegrepen gereedschap

Verwijdergereedschap

Benodigd gereedschap

Kruiskopschroevendraaier

Boor met een steenboortje van 6 mm (optioneel)

1.

Download de Ring-app.

2.

Scan de QR-code.

3.

Verwijder de beschermende verpakking.

4.

Kies een locatie voor de deurbel.

Installatie van deurbel

1.

Zonder de voedingsadapter aan te sluiten, voer je de voedingskabel van het stopcontact naar de plaats waar je de deurbel wilt installeren.

2.

Zet de voedingskabel vast met de meegeleverde kabelklemmen.

LET OP: als je de kabel door een muur, deur of raam laat lopen, wees dan voorzichtig met de elektrische bedrading en leidingen tijdens het boren.

3.

(Optioneel) Als je een hoekmontagebeugel gebruikt, installeer je de beugel over de snoeren van je deurbel met behulp van de onderste gaatjes in het boven- en ondergedeelte. Zorg ervoor dat de beugel in de gewenste kijkrichting wijst.

LET OP: er kunnen meerdere hoekmontagebeugels boven elkaar worden gestapeld. We raden aan om er maximaal twee te gebruiken.

Bij muren van stucwerk, baksteen of beton gebruik je een steenboortje van 6 mm om de gaten voor de inbegrepen pluggen te boren.

(Optioneel) Als je een kantelmontagebeugel gebruikt, installeer je de beugel over de snoeren van je deurbel met behulp van de schroeven die zijn meegeleverd met je kantelmontageset. Zorg ervoor dat hij naar beneden is gericht.

LET OP: er kunnen meerdere kantelmontagebeugels op elkaar worden gestapeld. We raden aan om er maximaal twee te gebruiken.

Bij muren van stucwerk, baksteen of beton gebruik je een steenboortje van 6 mm om de gaten voor de inbegrepen pluggen te boren.

4.

(Optioneel) Als je meerdere kantel- en hoekmontagebeugels installeert, steek je de schroeven door beide beugels om ze bij elkaar te houden.

5.

Installeer de montagebeugel op je steun of direct over de snoeren van de deurbel met de meegeleverde schroeven.

6.

Verwijder het voorpaneel van je deurbel door het verwijdergereedschap in de sleuf aan de onderkant van je deurbel te steken.

7.

Sluit de voedingskabel aan op de deurbel.

LET OP: je kunt elk willekeurig snoer in elke aansluiting plaatsen.

8.

Bevestig je deurbel door deze over de beugel te haken en omlaag te duwen.

9.

Draai de veiligheidsschroeven vast.

10.

Steek de voedingsadapter in het stopcontact.

11.

Test de deurbel om te controleren dat alles goed is aangesloten.

12.

Plaats het voorpaneel weer terug.

Utstyr som følger med

Verktøy som følger med

Demonteringsverktøy

Verktøy du trenger

Skrutrekker

Bor med 1/4 tommers (6 mm) murbits (valgfritt)

1.

Last ned Ring-appen.

2.

Skann QR-koden.

3.

Fjern beskyttelsesfolien.

4.

Velg en plassering for ringeklokken.

Montering av ringeklokke

1.

Uten å koble til strømadapteren fører du strømledningen fra stikkkontakten til der du skal montere ringeklokken.

2.

Fest strømledningen med de medfølgende ledningsklemmene.

MERK: Hvis du fører kabelen gjennom en vegg, en dør eller et vindu, må du være forsiktig med elektriske ledninger og rør når du borer.

3.

(Valgfritt) Hvis du skal bruke et hjørnefeste, monterer du festet over ringeklokkeledningene ved hjelp av de nederste hullene i de øvre og nedre delene, slik at det peker i ønsket visningsretning.

MERK: Flere hjørnefester kan brukes sammen. Vi anbefaler ikke mer enn to.

På stukkatur, murstein eller betong bruker du et 1/4 tommers (6 mm) murbor for å bore hull for de medfølgende veggfestene.

(Valgfritt) Hvis du skal bruke et kilefeste, monterer du festet over ringeklokkeledningene ved hjelp av skruene som følger med kilesettet, slik at det peker ned.

MERK: Flere kilefester kan brukes sammen. Vi anbefaler ikke mer enn to.

På stukkatur, murstein eller betong bruker du et 1/4 tommers (6 mm) murbor for å bore hull for de medfølgende veggfestene.

4.

(Valgfritt) Hvis du skal montere flere kile- eller hjørnefester, må du sette inn skruene gjennom begge festene for å holde dem sammen.

5.

Monter monteringsbraketten på festet eller rett over ringeklokkeledningene med de medfølgende skruene.

6.

Fjern frontplaten på ringeklokken ved å sette inn demonteringsverktøyet i sporet på undersiden av ringeklokken.

7.

Koble strømledningen til ringeklokkens ledningsterminaler.

MERK: Du kan feste hvilken som helst ledning til hvilken som helst terminal.

8.

Monter ringeklokken ved å henge den over braketten og trykke ned.

9.

Trekk til sikkerhetsskruen.

10.

Koble til strømadapteren.

11.

Prøv ringeklokken for å sikre at alt er riktig tilkoblet.

12.

Sett på frontplaten igjen.

ring.com/contact

Hårdvara som ingår

Verktyg som ingår

Borttagningsverktyg

Verktyg som behövs

Stjärnskruvmejsel

Borr med 6 mm betongborr (tillval)

1.

Ladda ner Ring-appen.

2.

Skanna QR-koden.

3.

Ta bort skyddsomslaget.

4.

Välj en plats för dörrklockan.

Installation av dörrklocka

1.

Utan att ansluta strömadaptern drar du strömkabeln från vägguttaget till den plats där du ska installera dörrklockan.

2.

Fäst strömkabeln med de medföljande kabelklämmorna.

OBS! Om kabeln dras genom en vägg, dörr eller ett fönster ska du vara försiktig med elektriska ledningar och rör när du borrar.

3.

(Valfritt) om du använder ett hörnfäste ska du montera detta fäste över dörrklockans eltrådar med hjälp av hålen i de övre och nedre delarna och se till att fästet är vänt i önskad visningsriktning.

OBS! Flera hörnfästen kan staplas tillsammans. Vi rekommenderar inte fler än två.

På stuckatur, tegel eller betong använder du en 6 mm betongborr för att borra hål för medföljande väggfästen.

(Valfritt) om du använder ett kilfäste ska du montera fästet över dörrklockans eltrådar med de skruvar som medföljer satsen med kilar och se till att det är vänt nedåt.

OBS! Flera kilfästen kan staplas ovanpå varandra. Vi rekommenderar inte fler än två.

På stuckatur, tegel eller betong använder du en 6 mm betongborr för att borra hål för medföljande väggfästen.

4.

(Valfritt) om du installerar flera kil- eller hörnfästen för du in skruvar genom båda fästena för att hålla ihop dem.

5.

Montera fästet på ditt monteringsfäste eller direkt över dörrklockans eltrådar med de medföljande skruvarna.

6.

Ta bort dörrklockans frontplatta genom att föra in borttagningsverktöget i öppningen längst ned på dörrklockan.

7.

Anslut strömkabeln till dörrklockans kabelterminaler.

OBS! Du kan ansluta vilken eltråd som helst till vilken terminal som helst.

8.

Montera din dörrklocka genom att haka fast den över fästet och trycka nedåt.

9.

Dra åt säkerhetsskruven.

10.

Koppla in strömadaptorn.

11.

Tryck på dörrklockan för att säkerställa att allt är korrekt anslutet.

12.

Sätt tillbaka frontplattan.

Mukana toimitettavat kiinnikkeet

Mukana toimitettavat työkalut

Irrotustyökalu

Tarvittavat työkalut

Ristipääruuvitalta

Pora 6 mm:n kiviporanterällä (valinnainen)

1.

Lataa Ring-sovellus.

2.

Skannaa QR-koodi.

3.

Poista suojakääre.

4.

Valitse paikka ovikellolle.

Ovikellon asennus

1.

Kytkemättä virtasovitinia, vedä virtajohto pistorasiasta ovikellon asennuspaikkaan.

2.

Kiinnitä virtajohto mukana toimitetuilla johdon pidikkeillä.

HUOMAUTUS: Jos kaapeli vietään seinän, oven tai ikkunan läpi, varo sähköjohtoja ja putkia, kun poraat reikää.

3.

(Valinnainen) Jos käytät kulmakiinnikettä, asenna se ovikellon johtojen päälle käyttämällä ylä- ja alaosan alemmaa reikää ja varmista, että se osoittaa haluttuun katselusuuntaan.

HUOMAUTUS: Kulmakiinnikkeitä voi pinota päällekkäin. Suosittelemme enintään kahta.

Jos asennat rapattuun tai tiili- tai betoniseinään, poraa reiät mukana toimitetuille kiinnitystulpille 6 mm:n kiviporanterällä.

(Valinnainen) Jos käytät kiilakiinnikettä, asenna se ovikellon johtojen päälle kiilapakkauksen mukana toimitetuilla ruuveilla ja varmista, että se osoittaa alaspäin.

HUOMAUTUS: Kiilakiinnikkeitä voi pinota päällekkäin. Suosittelemme enintään kahta.

Jos asennat rapattuun tai tiili- tai betoniseinään, poraa reiät mukana toimitetuille kiinnitystulpille 6 mm:n kiviporanterällä.

4.

(Valinnainen) Jos asennat useita kiila- tai kulmakiinnikkeitä, aseta ruuvit molempien kiinnikkeiden läpi, jotta ne pysyvät yhdessä.

5.

Kiinnitä asennuskiinnike kiinnikkeeseen tai suoraan ovikellon johtojen päälle mukana toimitetuilla ruuveilla.

6.

Irrota ovikellon etulevy asettamalla irrotustyökalu ovikellon pohjassa olevaan loveen.

7.

Liitä virtajohto ovikellon napoihin.

HUOMAUTUS: Voit liittää minkä tahansa johdon mihin tahansa napaan.

8.

Kiinnitä ovikello asettamalla se asennuskiinnikkeen päälle ja painamalla alas.

9.

Kivistä turvaruuvi.

10.

Aseta virtasovitin paikalleen.

11.

Varmista, että liitännät toimivat oikein soittamalla ovikelloa.

12.

Kiinnitä etulevy takaisin paikalleen.

Afmonteringsværktøj

Nødvendigt værktøj

Stjerneskruetrækker

Bor med et 6 mm (1/4") murborehoved (ekstraudstyr)

1.

Hent Ring-appen.

2.

Scan QR-koden.

3.

Fjern beskyttelsesfolien.

4.

Vælg en placering til din dørklokke.

Installation af dørklokke

1.

Uden at tilslutte strømadapteren skal du føre strømkablet fra stikkontakten til det sted, hvor du vil installere din dørklokke.

2.

Fastgør strømkablet med de medfølgende kabelklemmer.

BEMÆRK: Hvis kablet føres gennem en væg, en dør eller et vindue, skal du passe på elektriske kabler og rør, når du borer.

3.

(Valgfrit) Hvis du bruger et hjørnebeslag, skal du montere beslaget over dørklokkeledningen ved hjælp af de nederste huller i den øverste og nederste sektion, og sørg for, at den vender i den ønskede synsretning.

BEMÆRK: Flere hjørnebeslag kan stables oven på hinanden. Vi anbefaler ikke at stable mere end to.

Hvis du monterer på stuk, mursten eller beton, skal du bruge et 6 mm (1/4") murborehoved til at bore hullerne til de inkluderede murankre.

(Valgfrit) Hvis du bruger et kilebeslag, skal du montere beslaget over dine dørklokkeledninger ved hjælp af de skruer, der følger med dit kilesæt, og sørg for, at det vender nedad.

BEMÆRK: Flere kilebeslag kan stables oven på hinanden. Vi anbefaler ikke at stable mere end to.

Hvis du monterer på stuk, mursten eller beton, skal du bruge et 6 mm (1/4") murborehoved til at bore hullerne til de inkluderede murankre.

4.

(Valgfrit) Hvis du monterer flere kile- eller hjørnebeslag, skal du føre skruer gennem begge beslag for at holde dem sammen.

5.

Installer monteringsbeslaget på dit beslag eller direkte over dørklokkens ledninger med de medfølgende skruer.

6.

Fjern din dørklokkes frontpanel ved at indføre afmonteringsværktøjet i rillen nederst på din dørklokke.

7.

Tilslut strømkablet til din dørklokkes kabelterminaler.

BEMÆRK: Du kan tilslutte enhver ledning til enhver terminal.

8.

Monter din dørklokke ved at hæfte den over beslaget og trykke ned.

9.

Spænd sikkerhedsskruen.

10.

Tilslut strømadapteren.

11.

Ring på din dørklokke for at sikre dig, at alt er tilsluttet korrekt.

12.

Sæt frontpanelet på igen.

مفك المسامير المتقاطع الرأس Phillips

أداة حفر مع رأس لثقب البناء بقياس 6 مم (اختياري)

1.

قُم بتنزيل تطبيق Ring.

2.

امسح رمز الاستجابة السريعة ضوئيًا .

3.

أزل الغلاف الواقعي .

4.

اختر موقعًا لجرس الباب الخاص بك .

1,20 م (4 أقدام م)

2.

ثبّت كابل الطاقة باستخدام مشابك الكابل المضمنة .

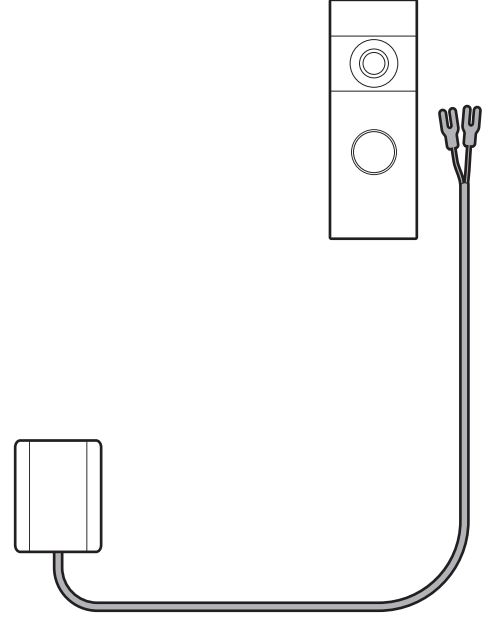

ملاحظة: في حالة تمرير الكابل عبر جدار أو باب أو نافذة، توخ الحذر من الأسلاك الكهربائية والأنابيب عند الحفر.

تركيب جرس الباب

1.

من دون توصيل محوّل الطاقة، مرّر كابل الطاقة من مخرج الكهرباء إلى المكان الذي ستركّب فيه جرس الباب.

على الجص أو الطوب أو الخرسانة، استخدم رأس لثقب البناء بقياس 6 مم لحفر الثقوب لمرتكزات الحائط المضمنة.

3.

(اختياري) إذا كنت تستخدم رافعة الزاوية، فركّب الرافعة فوق أسلاك جرس الباب باستخدام الفتحات السفلية في الجزأين العلوي والسفلي، مع التأكد من أنها موجهة نحو اتجاه العرض المطلوب.

ملاحظة: يمكن تكديس أكثر من عدة زاوية فوق بعضها البعض، لا نوصي باستخدام أكثر من رافعتين.

على الجص أو الطوب أو الخرسانة، استخدم رأس لثقب البناء بقياس 6 مم لحفر الثقوب لمرتكزات الحائط المضمنة.

(اختياري) إذا كنت تستخدم رافعة مائلة عموديًا، فركّب الرافعة فوق أسلاك جرس الباب باستخدام المسامير المضمنة مع عدة الأركان، مع التأكد من أنها موجهة نحو الأسفل.

ملاحظة: يمكن تكديس عدة حوامل تثبيت مائلة عموديًا فوق بعضها البعض. لا نوصي باستخدام أكثر من حاملين.

5.

ركّب لوحة التثبيت على الرافعة أو مباشرة فوق أسلاك جرس الباب باستخدام المسامير المضمنة.

4.

(اختياري) إذا كنت تقوم بتركيب عدة حوامل تثبيت أو عدد زاوية، فأدخل المسامير عبر كلا الرافعتين لتثبيتهما معًا.

6.

أزل لوحة واجهة جرس الباب الخاص بك عن طريق إدخال أداة الإزالة الموجودة أسفل جرس الباب.

7.

قُم بتوصيل كابل الطاقة بأطراف سلك جرس الباب.

ملاحظة: يمكنك توصيل أي سلك بأي طرف.

8.

ثَبِّت جرس الباب الخاص بك عن طريق تعليقه على اللوحة والضغط عليه نحو الأسفل.

9.

اربط مسمار الأمان بإحكام.

10.

قُم بتوصيل محوّل الطاقة.

11.

جرب جرس الباب للتأكد من أن كل شيء متصل بشكل صحيح.

12.

أعد تثبيت لوحة الواجهة.
